PROJECTS

Prep AI (Fullstack)-AI Powered Mock Interview Platform

[Github](#)

- Next.js (App Router), TypeScript, Vapi AI, Google Gemini, Firebase, Firestore, Zod, Tailwind CSS, shadcn/ui
- Built a high-performance interview prep platform in **Next.js with Firebase**, capturing role, level, and question count to generate tailored sessions in under **500ms**.
- Integrated **VAPI AI** for real-time voice interaction and Google **Gemini** for context-aware question generation and post-session feedback, creating an immersive practice environment.

Learnix AI - AI Powered Learning Platform

[Github](#)

- Developed an AI-powered adaptive learning platform that delivers personalized and interactive learning experiences using Generative AI.
- Integrated **Gemini API (LLM-based architecture)** for dynamic quiz generation, flashcard creation, concept expansion, and automated PDF summarization.
- Designed a **RESTful backend using Node.js** to handle API requests, prompt engineering, and response processing efficiently.

QuickChat - Real-Time Messaging Application

[Github](#)

- Tech Stack: Node.js, Express.js, React.js, MongoDB, Socket.io, JWT, Cloudinary, Tailwind CSS
- A **Real-Time Chatting** Platform designed to make communication seamless and efficient. Built using the **MERN stack** and powered by **Socket.io**, QuickChat delivers instant messaging for individuals and channels without any delay.
- **User Authentication Authorization** : Implemented **JWT-based authentication** with secure login and session management
- **Channel Support**: Users can create channels, accommodating conversations with **up to 10- 12 participants per channel**.
